PROJECTS

Food and waste management

Oct'23

- Domain: Web Application|
- Programming Languages: HTML, CSS, JavaScript
- Created a comprehensive webpage to educate the public on food waste reduction and sustainable waste management practices.
- Conducted extensive research to gather and synthesize information on food waste statistics, causes, and solutions.
- Designed a user-friendly interface with clear navigation and engaging visuals to enhance user experience.
- Incorporated interactive elements and multimedia content, such as videos and infographics, to increase engagement and comprehension.
- Implemented social media integration to promote the webpage and reach a wider audience.

E-Commerce website for fashion retails

Nov'23

- Domain: Web Application |
- Programming languages: HTML, CSS, JavaScript
- Role: Web Content Developer
I was responsible for the development and maintenance of an ecommerce website for a fashion retail company. The website was designed to provide customers with a user-friendly and secure online shopping experience. I was also responsible for marketing the website and increasing online sales

Home Automation

Nov'23

- Domain: Hardware Project |
- Programming languages: C++
- Role: Do software and hardware part of project
This project controls home attributes such as lighting, entertainment system, appliances to make life style easy. Home automation makes it possible to automate tasks related to security, well-being, and comfort through a smart system installed in a home or building
